Please note that capital is at risk with any investment. The potential for profit is accompanied by the possibility of loss. Investments do not guarantee a return, and the value and income from them can fall as well as rise, so that you may not realise the amount originally invested. Past performance is not a reliable indicator of future results. Any figures or data on past returns are for illustrative purposes only and do not guarantee future performance. Asset allocation, diversification and rebalancing strategies do not ensure gains nor guarantee against loss. The use of leverage, shorting, and derivative strategies may accelerate the velocity of the potential losses. The use of currency strategies involves additional risks. Where an investment is denominated in a currency other than the chosen reference currency, changes in the exchange rates between currencies may cause the value of investments to go up or down.
